

ALLDAY TIME SYSTEMS LTD

Allday Time Manager Lite

• Outstanding efficiency for small businesses

The Allday Time Manager Lite edition attendance system offers exceptional mid level features for the modern small to medium size business. Assisting in the accurate preparation of payroll information and labour resource management, including an absence management module.

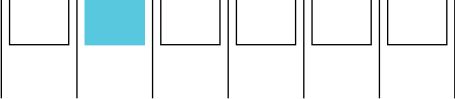

Easily installed with only minimal PC knowledge required. However should it be required, the backup of a full support helpdesk team is on hand for the first 60 days, or the option of a qualified hardware engineer is available should you need one. The system includes many reports to assist you including clock card style reports. Also absence and exception reports for such things as lateness and unexpected absence.

The latest Microsoft .Net[®] technology is used coupled with SQL databases giving you a fully scalable product should your needs change in the future.

The system can be installed on your existing network using your current cabling infrastructure.

• Key features

- Choice of Biometric Fingerprint or Proximity terminals.
- 100 employee capacity system.
- SQL database.
- Fire roll call report.
- Export file for payroll.
